

Description

Communication designer, teacher, design thinker, innovator, team player, multi-tasker, tech and gadget freak.

Education / Knowledge

Amass knowledge spanning the arts and technology, encompassing music, artificial intelligence, virtual and augmented reality, 3d printing, languages, electronics, computing, photography, graphic design, innovative thought, social media, and communication design. Embrace the ethos that education is an unending journey, perpetually expanding one's horizons.

Vision & Dreams

I'm not merely a dreamer; I'm a visionary. My guiding principle is to unlock potential and present opportunities for others.

Passions

I possess a fervent passion for kindling inspiration and forging opportunities. My enthusiasm spans the realms of arts and design to science and technology. I champion clarity and simplicity, always advocating for evidence-based reasoning. My approach is consistently customer-centric, emphasizing human-centered design with an unwavering patience and focus.

Projects

I specialize in crafting designs tailored for AI and VR initiatives, orchestras, prominent American universities, and global social enterprises. My expertise extends to creating presentations for multinational corporations, developing designs rooted in comprehensive data collection and visualization. I seamlessly merge technology to unveil untapped service opportunities. My research capabilities shine in identifying novel services, while I also offer consultancy in PR, HR, social media, and branding across diverse industries. My portfolio is further enriched with creative direction and more.

Tools

I champion the integration of design with lateral thinking, balancing imagination's spark with the pull of inspiration. My approach marries focus with receptivity, fostering both clear communication and collaborative synergy. I thrive on visual inspirations, ever eager to explore and observe, leading to ideation. The cycle culminates in prototyping, with an unwavering commitment to refinement and enhancement.

Challenges

Gather precise data, avoid assumptions, approach issues without bias, stay updated with cutting-edge technology, prioritize sustainability, keep an eye on the overarching goals, embrace failures as learning opportunities, continually question the status quo, demand evidence, and remember to maintain humility and humor.

Employments

I have a penchant for spearheading projects. My portfolio boasts collaborations with renowned organizations ranging from social enterprises and non-profits to the realms of art, culture, museums, and orchestras. Additionally, I've partnered with universities and diverse sectors, including fashion, energy, glass manufacturing, publishing, and recruitment.

Skills

I excel at discerning and comprehending the needs of individuals, transforming insights into actionable solutions through strategic and creative thinking. My strengths lie in problem-solving, captivating and inspiring others, fostering desires, and motivating action. Additionally, I adeptly prototype and evaluate for optimized results.

Distractions

Individuals with a limited perspective, an absence of curiosity, and devoid of empathy, who often eschew rationality and readily accept beliefs without evidence or scientifically-backed proof.

Energizers

I value disseminating knowledge and identifying design areas that require refinement. I am invigorated by brilliant ideas and connecting with individuals who share a unified vision. Embracing an open-minded perspective, I find enrichment in travel, visual inspiration, emerging technologies, and impeccably designed gadgets. I'm consistently inspired by visionary leaders.

Current Situation

I remain deeply committed to projects, consistently on the hunt for partnerships that pave the way for inventive resolutions to meticulously identified issues. With time, my outlook has grown increasingly positive and optimistic. My experience has deepened, my perspective has taken on a more global tint, and I feel an unparalleled sense of freedom.
